## Projects details

**Name:** Godown management system.

**Technologies used:** Python 3.7.2, Django 2.2 framework.

**Role:**

- ➢ writing of server-side web application logic.
- ➢ Developing back-end components.
- ➢ maintained front-end code by integrating with the Django application.

**Description:** Some of the factories will maintain their product in their own GODOWNs until those will be delivered to the suppliers. Whenever the supplier needs the stock then the factories will forward the requested stock to the suppliers.

The main objective of this system is to provide a mediation interface among the factories, suppliers and the mediators who will carry the stock and store in their own GODOWNs and forward them to the suppliers when required.
